

At Pearson, we know that not every student learns the same way. To enhance the personalized learning experience of select MyLab™ courses, we are launching Skill Builder Adaptive Practice.

Skill Builder Adaptive Practice is a new feature that provides just-in-time, in-assignment recommendations based on your performance to help you improve the skills and knowledge you need to succeed.

### How does Skill Builder Adaptive Practice work?

1. As you complete your assignment, you will be presented with the option to use Skill Builder; it will remain optional throughout the entire course. At any point during Skill Builder, you can return to your homework assignment.

2. Skill Builder offers additional practice problems on the particular topic you need help with and returns you to your assignment once you've demonstrated you're ready to try your homework again.

3. Your work in Skill Builder will not count toward your homework grade. It is not-for-credit, additional practice.

### How does participating in this pilot benefit you?

- You now have access to additional, targeted practice to help you improve.
- Your feedback will be heard! You will have regular opportunities to tell us what you think about Skill Builder.
- Your input will directly inform future development and enhancements of this feature.

In case of questions, comments or concerns, please email Kaitlyn Banaszynski at [kaitlyn.banaszynski@pearson.com](mailto:kaitlyn.banaszynski@pearson.com).

*Your participation and collaboration are greatly appreciated!*
