What is The WISE Society?
The WISE Society (Women Inspiring a Sisterhood of Entrepreneurs) was created to provide support, encouragement and education at all stages of a woman’s entrepreneurial journey. This exclusive society is comprised of successful women and organizations that believe in and are committed to the success and empowerment of other women.

Our mission is to promote economic self-sufficiency and self-determination by empowering women of vision through comprehensive training, consultation, and essential support services as they navigate the course of their entrepreneurial journey.

What is The Edge Connections Women’s Business Center?
The Edge Connection’s Women’s Business Center is the only Small Business Administration Women’s Business Center in Cobb County, and one of only two women’s business centers in the state of Georgia. We specialize in meeting the needs of women entrepreneurs through the delivery of best-practices in micro and small business development. Our expert staff and consultants provide high-quality training, financial literacy, entrepreneurially focused instruction, and essential support services to aid women business owners as they launch, sustain, or grow their businesses.

Like all non-profits we rely not only on grants and paid employees to accomplish our mission, but also the unwavering support of volunteers and financial contributions from the community at large.
