Paper Guidelines
ANTH 3315 Southeastern Indians
Van Horne

- The topic must be approved by the Professor prior to writing the paper.

- The paper must be a research paper, not a report.

- You must have a research question and you must answer/address this question as completely as possible with available research literature.

- The paper must be ten pages of text. The cover page and references cited do not count toward the ten pages.

- Cover page must have the title and your name only.

- The AAA style guide must be used for citation formatting. This includes having a “References Cited” page at the end of the paper and formatting references in the text correctly, e.g: (Hudson 1976:88-90). It is available at: http://www.aaanet.org/publications/style_guide.pdf

- The paper must be stapled in the upper left corner. No report covers allowed.

- The paper must have one inch margins top, bottom, left and right, just like this page.

- Courier 12 point font only.

- Paper must be double-spaced except for the References Cited page.

- Pages must be numbered. Do not have a “running header” in your paper.

- References must be academic books and articles. Academic articles retrieved from the internet and other electronic sources are allowed.

- Internet sources are not allowed. Use of the course textbook as a source is not allowed. Citations from Wikipedia will result in a grade of “F” for the paper.

- Plagiarism will result in an “F” for the paper. It is easy
to avoid plagiarism. If you are using any facts, ideas or conclusions from a printed source, simply cite the source in the text after using the information. If you want to quote some text from a source, follow the AAA style guide to insert the quote in your paper, then provide the citation.
